## PROFESSIONAL SUMMARY

**Full Stack Developer** with nearly **3 years of experience**, specializing in React.js, JavaScript, Java, and AWS. Proficient in designing scalable web applications and leading development teams in Agile environments. Demonstrated success in delivering high-quality features that boosted **user engagement by 23% and revenue by 15%**. Skilled in mentoring junior team members, optimizing development processes, and ensuring adherence to best practices.

## SKILLS & ABILITIES

**Frontend Development:** React.js, Redux, TypeScript, HTML5, CSS3, JavaScript

**Backend Development:** Node.js, Java, Spring Boot

**Database:** MySQL, MongoDB

**Cloud & DevOps:** AWS (EC2, S3, Lambda, DynamoDB, CloudFormation), Docker

**Architectures:** Microservices, API-First Development, SDLC, CI/CD Pipelines

**Testing & Tools:** Jest, JUnit, Postman, Git

**Security & IAM:** OAuth, JWT, MFA, IAM Policies

## EXPERIENCE

**Software Engineer | Indium Software — Bangalore, India**

Jun 2022 – Present

- **Developed and launched 35+ features, boosting revenue by 15%** and enhancing customer satisfaction.
- **Implemented user profile and customization features**, reducing latency by using CDNs and caching, **increasing user engagement by 23%**.
- **Resolved 50+ Critical Issues:** Used Jira for issue tracking and Datadog for root cause analysis to improve system reliability and reduce downtime.
- **Created Documentation:** Developed a knowledge base in Confluence with setup guides and automated scripts, **cutting onboarding time by 40%**.
- **Delivered two feature releases weekly**, reducing customer bug reports by one-third monthly.

**Teaching Assistant | Coding Ninjas — Remote**

Mar 2023 – May 2023

- **Guided over 100 students** in learning JavaScript, React.js, and Node.js through project-based learning.
- **Earned an instructor rating of 4.6/5** by effectively addressing student queries and providing hands-on guidance.

## PROJECTS

### Company's Projects

- **FarmVille 2 & 3, Harry Potter: Puzzles & Spells:** Improved gameplay performance using Unity, JavaScript, and AWS, **reducing load time by 20%**.
- **Developed user profiles with customization**, optimized performance using CDNs and caching, **boosting engagement by 23%**.

### Personal Projects

- **Real-time Code Editor:** Built a collaborative coding platform with live updates using WebSockets and React.js.
- **Job Portal:** Built a secure job portal integrating Supabase for authentication and RESTful APIs for real-time data syncing.
